

PRESS RELEASE

Dataline signs channel partner agreement for Spain with Cyan.

Bruges, March 2, 2020– [Dataline](#), the market leader in ERP/MIS solutions for sign and print production companies, announces it has signed a new channel partner agreement for Spain with Cyan (www.cyanfuji.com) The company Cyan, based in Madrid, is one of the largest suppliers in the graphic arts industry in Spain. Thanks to their high-skilled staff, Cyan is a successful supplier of advanced hard- and software solutions to the commercial, packaging and large format printing industries.

Luis Gonzales Caridad, ceo at Cyan explains: "Many of our existing customers in offset, digital print and large format printing are looking for solutions to automate their administrative workflow and to further optimise their printing operations. After thorough investigation, we are now convinced that MultiPress is the best ERP software for graphic arts companies in Europe, and a great complement to our product portfolio."

Dirk Deroo, Dataline ceo adds: "The further European expansion of Dataline continues as planned. Recently we signed a distribution agreement in Poland. In Spain we now have a channel partner agreement with Cyan. They are one of strongest and most respected suppliers to the industry in Spain and we are convinced that they have the capacity to untap the large potential for MultiPress in their country.

About Dataline and MultiPress

Dataline Solutions develops ERP business software for dynamic offset, print, finishing, sign, large-format & textile printing companies (MultiPress) and advertising & communication agencies (QuoJob).

MultiPress is an MIS/ERP software solution developed from the needs of the graphics industry that links all administrative, commercial, financial, and logistics processes within the graphics company. It includes a CRM function, quotations, order management, logistics & forwarding management, planning, and invoicing. MultiPress integrates the company's production software and guarantees an automatic information exchange. MultiPress thus forms a fully integrated system by linking administration, sales, and production. It accelerates processes, increases efficiency, eliminates errors, and ensures transparency of all the costs. With more than 8000 users, MultiPress is the standard ERP/MIS software in Belgium and The Netherlands. MultiPress is growing in all of Europe: the software is now used in 19 countries and is available in 11 language versions. For more information, please visit www.dataline.eu.
